

Fire Guidance UK LLP

Environmental policy

Fire Guidance UK LLP (hereinafter referred to as **FGUK**) is a specialist consulting company which offers services related to all matters of fire protection and safety.

FGUK recognises the importance of protecting the environment and that the provision of fire safety advice may, in certain circumstances, have an environmental impact. **FGUK** actively seeks to minimise any environmental impact that may arise from the provision of fire protection and safety recommendations, whether that be from material specification or day to day running of the business.

FGUK is committed to:

- Continued monitoring and improvement of its environmental performance;
- Pollution minimisation or prevention;
- Compliance with all statutory requirements, regulations and codes of practice relevant to the fire safety industry.

It is **FGUK** policy to:

- Make efficient use of resources by conserving energy and water, minimising waste and recycling wherever and whenever practical;
- Make use of energy efficient transport provisions, such as mass transit transport and general public transport wherever possible;
- Ensure that any fire protection and safety recommendations made take into account any potential for environmental impact including material carbon footprint, pollution due to use or misuse and make recommendations for operational containment and/or clean-up in the event of material discharge.

FGUK reviews this environmental policy on an annual basis to account for any legislative changes that may occur from time to time, changes in **FGUK** operations and any other factors relevant at the time of review.

The **FGUK** environmental policy is made freely available to **FGUK** employees, sub-contractors and suppliers and available on request to any other interested parties including members of the public.

The **FGUK** environmental policy will also be made available, in due course, on the company website.

Signed

Pete Muir
